Think Sinks

Colorful backsplashes and sculpted hardware frequently showcase artisan details. Beautiful and innovative designs also transform the unexpected medium of sinks. SPACE CASE

In the Round

The circle's the shape of the moment in kitchen design, where it adds an unexpected twist. The curving metal Acropolis kitchen from Snaidero combines a cooktop, storage, sink, and more into a statement piece that puts the chef at the center of the action. Designed by Pininfarina Design and constructed of recycled materials, the Acropolis is outfitted with modern ideas, including an ergonomic design and energy-efficient LED lighting.
