←**Finishes You'll Fancy** // Its name may sound paradoxical, but Plain & Fancy's Custom Cabinetry line is a logical addition to today's well-adorned abodes. And now it includes a full house of haute new contemporary acrylic and thermofoil finishes available in scads of solids, realistic wood grains, metallic textures, and high glosses. The hundreds of standard hues include Dark Gray, Ruby Red, and Snow White. Wired Bronze and Wired Copper are popular metallic options, and wood grains like Natural Wenge and Kasei Maple sell like hotcakes. And while it looks like a million bucks, the Euro-centric collection is priced at a point that's well within reach. →**Art of the Home** // Turn your current kitchen into a work of art with Merillat Masterpiece, a high-end line of semi-custom cabinetry that adds a dash of gorgeous to upmarket culinary quarters. And with the recent addition of four new door styles, 24 new finishes (like Rye, Cardinal, Mushroom, and Parchment), six new vanity selections, additional accessories, and hardware, your opportunities to gussy up your surroundings are pretty much endless. Case in point: Breland (pictured here) imbues rooms with a warm metropolitan look and is available in maple, cherry, and oak. Merillat, [www.merillat.com](http://www.merillat.com).

←**Ola.Ola ... Ooh la la!** // News flash for fans of Snaidero's best-selling Ola. Ola kitchen: First introduced in 1990, the concept has been updated and re-released. Its new incarnation, deemed Olazo, has a more contemporary and elegant look, while upholding the character and ingenuity of the original line. Featuring whisper-light curves amid a linear backdrop, it's unassumingly elegant. The island and peninsula countertop rest atop a curvilinear sculpted base composed of multilayered wood. Olazo also features low-energy consumption lighting with strips of LED lights fitted under the upper cabinets and inside the units, guaranteeing even and controlled distribution of your kitchen illumination.
