TODAY'S KITCHEN, AN INVITING COMFORTABLE space where everyone congregates. With its beauty, functionality and blending of design elements, the kitchen has become the main event of a home. Family, friends, neighborhood kids, even the family pets prefer the kitchen to any other room. The rules for design for this room are simple: incorporate the wants and needs of the every member of the family while keeping it aesthetically pleasing, casual, functional and welcoming.

Creating a designated beverage and snack zone within the kitchen space, benefits the whole family. A dedicated beverage zone complete with a refrigerator drawer for drinks and a wine cooler for chilled aperitifs, allows friends and family to serve themselves without bothering the chef. And an under the counter refrigerator drawer for kids provides a perfect solution for housing after school treats. Easy access to refrigerated drawers and coolers within a kitchen, enables families to cook and congregate without disturbance. *(continued)*

**TOP RIGHT:** As noticed on the back wall, muted blue colors are gaining popularity this year while statement lighting continues to set the stage in kitchens.

**MIDDLE RIGHT:** This kitchen utilizes every available space for horizontal cabinetry, even above the windows. Ambient lighting creates focal points throughout.

**BELOW:** A linear design that mixes woods, veneers and metals. With "hidden" appliances like the refrigerator and cooktop, the emphasis remains on the focal point of the home, the floor to ceiling views of the city scape.

“No matter where I serve my guests, they seem to like my kitchen best.”
