Snaidero USA has made a name for itself as one of the preeminent manufacturers and distributors of made-in-Italy luxury cabinetry. The American brand has supplied over 200 projects in North America, most notably multi-housing developments. The now-iconic ELEGANTE Bespoke kitchen cabinet, Riquadro sideboard systems, and Living collection—high-end bath vanities, closet systems, and internal doors—can be found in countless luxury projects from New York to Los Angeles.

Most recently, Snaidero USA helped outfit Chicago's St. Regis tower. The 101-floor Studio Gang-design project features 393-unit which the design company helped build-out. It is the 22nd luxury high-rise development that Snaidero USA has served in the city in collaboration with its local partner, Studio Snaidero Chicago.
